How to Use the Discover Search Tool

Type your search terms here and hit the enter key.

Your search returned over 2 million results. You’ll want to add more terms to refine your search and add limits.
Adding more search terms and limiting the results to Scholarly Journals only, from 1990 to present, has reduced the number of results to under 3,000.

Now you can look at the articles by clicking the PDF, Linked Full Text or Find It GSU icons.
When you click into the article you can read the abstract and use tools to send the citation to your email, print it or save it.

If you need help, for immediate assistance use the Live Assistance chat box on the right. Or you can click the Ask a Librarian link above to find your subject librarian who will be able to help you.
