Course Description:

This course is geared towards potential History and Women’s Studies majors, but is open to any student interested in learning more about searching for and interpreting primary sources, an important skill for many humanities-oriented majors. In this course, we will be exploring various issues in the history of dating in American culture during roughly the second half of the 20th century, while also learning to search for primary-source materials documenting that history. Students will choose a topic within that broader topic and learn to search for a broad range of primary-source types on their chosen topic. In-class exercises will provide instruction and discussion on various source types.

This course is administered through a course guide available through the library’s Research Guides: http://research.library.gsu.edu/datinghistory. I recommend that you bookmark this site. We will not be using iCollege for this course.

You can access the course guide directly at the URL provided. You can also find this guide under the library’s Research Guide tab, listed under the categories of Honors College, History, and Women’s, Gender, and Sexuality Studies.

Prerequisite: Acceptance into the Honors College.

Course Objectives:

● Through in-class exercises and short assignments, you will gain experience in searching for and interpreting primary-source materials in a wide range of formats.
● You will develop basic searching skills, applicable to searching in the library catalog, in the library’s databases, and for online searching.
● You will practice basic discussion skills as we discuss examples of various types of primary sources.
● You will practice basic presentation skills by presenting the final results of your research as a brief PowerPoint presentation using in-classroom technology.
Required Texts:

You will be assigned short readings and viewings. All required readings/viewings will be made available through the course guide (http://research.library.gsu.edu/datinghistory).
