Creating Automatic Search Updates in Google Scholar

Google Scholar alert tips:

Create search alert emails in Google Scholar

1. Navigate to Google Scholar: https://scholar.google.com/
2. Use the main search box to perform a search for your topic of interest.
3. Click the “Create alert” button with the envelope icon in the left sidebar of the search results page.
4. Enter your preferred email address (it does not have to be a Gmail address), and click “Create alert”.
5. If you ever wish to cancel Google Scholar alerts, there is a link at the bottom of the notification emails. If you are connected to a Google account, you can also edit your alerts in the Google Scholar settings menu.

Link Google Scholar to GSU Library resources

1. First, log in to your Google account. This ensures your settings will be saved to your profile for later use.
2. From the main Google Scholar page, click on the menu icon in the upper left corner (three gray horizontal bars).
3. Select “Settings” from the menu.
4. Then select “Library links” from the left hand sidebar.
5. Search for “Georgia State University” and check the box that appears. Click “Save”.
6. “Find It @ GSU” links should now appear in your Google Scholar searches, although you may still be asked to log in with your Campus ID and password to access the full text of an article.
