Products:

Abstract: Under the Kyoto Protocol, **developing countries** can voluntarily participate in climate change mitigation through the Clean Development Mechanism (CDM), in which industrialized **countries**, in order to meet their mitigation commitments, can buy emission reduction credits from projects in **developing countries**. Before its implementation, developing-country experts opposed the CDM, arguing that it would sell-off their countries' cheapest emission reduction options and force them to invest in more expensive measures to meet their future reduction targets. This 'low-hanging fruit' argument is analysed empirically by comparing marginal...

HISTORICAL CONTEXT
original writings of Beat women.

*Miles, a friend of Ginsberg, does an excellent job of portraying his subject as both the legendary Beat poet and as an average man in everyday life. This book provides a solid biography of Ginsberg and explores the effect of the Beat Movement on American culture and mindset and how it anticipated the more radical times of the 1960s.*

*This biography of Burroughs is well written. The biographer's success derives from the thoroughness of his research that provides details on such subtopics, as a history of Los Alamos, Texas, where Burroughs attended school. Literary Outlaw provides a fair and provocative look at a Beat icon whose decadent life makes for fascinating reading.*
